

What is clubgolf?

clubgolf offers children a structured programme which supports their early development as golfers. clubgolf is aligned to Scottish Golf's Player Pathway (see below), ensuring opportunities for talented players to progress further based on their potential, commitment and achievement.

The Dollar GC coaching scheme is based on a 3 stage progression

clubgolf Stage1

Participating players will expect to develop their basic golfing skills so they can eventually play a full round on the course unsupervised and safely. Golf skills taught include putting, chipping, pitching and the full swing. Their training also equips them with a fundamental understanding of the game including rules and etiquette, and they will learn a code of conduct that will ensure their golfing experience is safe and fun. On moving to Stage 2 they will have shown an ability to play Junior competitions on Sunday afternoons unsupervised.

clubgolf Stage 2

Participating player members of the club will expect to develop their golfing skills during practice and Junior competitions to the point where they are able to attain a CONGU handicap i.e. playing off the adult medal tees and scoring under 100.

As well as further developing the basic golf skills, and the rules & etiquette knowledge learned in Stage 1, they will be introduced to more complex concepts including shot-making skills, course management and dealing with a range of situations that can arise on the golf course to enable them to enjoy playing as equals in adult competitions.

clubgolf Stage 3

By this time junior members will probably be receiving professional coaching with progress to advanced Stage 3 golf skills and representation at higher levels.

Player Pathway
